Contents Volume 144

1 A branch and bound to minimize the number of late jobs on a single machine with release time constraints
P. Baptiste, L. Peridy and E. Pinson

12 A tabu search heuristic and adaptive memory procedure for political districting
B. Bozkaya, E. Erkut and G. Laporte

27 Genetic algorithms for rerouting shortest paths in dynamic and stochastic networks
C. Davies and P. Lingras

39 Optimizing the use of contingent labor when demand is uncertain
E.J. Pinker and R.C. Larson

56 Optimisation of the interconnecting network of a UMTS radio mobile telephone system
M. Fischetti, G.R. Jacur and J.J.S. González

68 Optimal pricing and ordering policies for perishable commodities
Y.H. Chun

83 A multiple-crane-constrained scheduling problem in a container terminal
E.K. Bish

108 Scale characterizations in a DEA directional technology distance function framework
H. Fukuyama

128 Dynamic rationing policies for product with incremental upgrading demands
P.-S. You

138 Dynamic shortest path in stochastic dynamic networks: Ship routing problem
A. Azaron and F. Kianfar

157 Cycle analysis of a two-phase queueing model with threshold
T.-S. Kim and H.-M. Park

166 Near optimal admission control for multiserver loss queues in series
C.-Y. Ku and S. Jordan

179 A new hierarchical architecture for Air Traffic Management: Optimisation of airway capacity in a Free Flight scenario
P. Dell'Olmo and G. Lulli

194 Light-duty vehicles and external impacts: Product- and policy-performance assessment
S. Ylvinger

209 Strategic investment in technological innovations
K.J.M. Huisman and P.M. Kort

224 How to allocate funds within the army
I. Haapalinna

235 Editorial: Collaboration in Logistics

237 Technological changes—the impact on the raw material flow and production
B.I. Bendiksen and B. Dreyer

PII: S0377-2217(02)00693-8

247 Logistics in the Öresund region after the bridge
T. Skjött-Larsen, U. Paulsson and S. Wandel
257 Charge the relationships and gain loyalty effects: Turning the supply link alert to IT opportunities
C. Gunnarsson and S. Jonsson
270 Electronic commerce, marketing channels and logistics platforms—a wholesaler perspective
N. Aldin and F. Stahre
280 Electronic marketplaces: A literature review and a call for supply chain management research
M. Grieger
295 Freight transport growth—a theoretical and methodological framework
L. Drewes Nielsen, P. Homann Jespersen, T. Petersen and L. Gjesing Hansen
306 Does supply chain management really pay? Six perspectives to measure the performance of managing a supply chain
A. Otto and H. Kotzab
321 Quality criteria for qualitative inquiries in logistics
Á. Halldórsson and J. Aastrup
333 Genetic search over probability spaces
S. Bhattacharyya and M.D. Troutt
348 A branch-and-bound procedure for the multi-mode resource-constrained project scheduling problem with minimum and maximum time lags
R. Heilmann
366 Solving the competitive discretionary service facility location problem
T.-H. Wu and J.-N. Lin
379 Vehicle dispatching with time-dependent travel times
S. Ichoua, M. Gendreau and J.-Y. Potvin
397 Aggregation of dispersed consequences for constructing criteria: The evaluation of flood risk reduction strategies
R. Azibi and D. Vanderpooten
412 Fuzzy pair-wise dominance and fuzzy indices: An evaluation of productive performance
K. Triantis, S. Sarangi and D. Kuchta
429 An interactive approach for placing alternatives in preference classes
M. Köksalan and C. Ulu
440 A multi-period game theoretic model of venture capitalists and entrepreneurs
R. Elitzur and A. Gavious
454 Measuring economic efficiency with incomplete price information
T. Kuosmanen and T. Post
459 The compromise hypersphere for multiobjective linear programming
S.I. Gass and P.G. Roy
480 A goal programming procedure for solving problems with multiple fuzzy goals using dynamic programming
B.B. Pal and B.N. Moitra
492 Second order symmetric duality in multiobjective programming
S.K. Suneja, C.S. Lalitha and S. Khurana
501 Generalized invex monotonicity
G. Ruiz-Garzón, R. Osuna-Gómez and A. Rufián-Lizana
513 Imprecise data envelopment analysis (IDEA): A review and improvement with an application
J. Zhu
530 Compensating for non-homogeneity in decision-making units in data envelopment analysis
D.A. Haas and F.H. Murphy

545 Enhanced bisection strategies for the Maximin Efficiency Ratio model
M.D. Troutt and T.W. Leung
554 Non-differentiable second order symmetric duality in mathematical programming with *F*-convexity
X.M. Yang, X.Q. Yang and K.L. Teo
560 Obtaining a good primal solution to the uncapacitated transportation problem
R.R.K. Sharma and S. Prasad
565 Minimization of travel time and weighted number of stops in a traffic-light network
Y.-L. Chen and H.-H. Yang
581 Genetic algorithms with double strings for 0–1 programming problems
M. Sakawa and K. Kato
598 Single machine scheduling with symmetric earliness and tardiness penalties
J.A. Ventura and S. Radhakrishnan
613 Two alternative models for farm management: Discrete versus continuous time horizon
B. Vitoriano, M.T. Ortuño, B. Recio, F. Rubio and A. Alonso-Ayuso
629 A simulated annealing methodology to distribution network design and management
V. Jayaraman and A. Ross
646 Channel redistribution with direct selling
D.-Q. Yao and J.J. Liu
659 Comparative normative optimal behavior in two-echelon multiple-retailer distribution systems for a single-period product
A.H.L. Lau and H.-S. Lau
677 Optimal pricing and lot-sizing under conditions of perishability, finite production and partial back-ordering and lost sale
P.L. Abad
686 Contents Volume 144
